PROJECTS

Equipment Failure Detection System

Developed an integrated solution that monitors equipment health using real-time sensor data such as vibration and temperature. Implemented automated workflows to analyze abnormal patterns and trigger alerts. Built a responsive interface for live monitoring and predictive insights.

Technologies Used: Hardware Sensors, n8n Automation, FlutterFlow UI, Dart, Firebase

Direct Farmer-Customer Marketplace App

Developed a platform that enables direct, middleman-free transactions between farmers and customers. Farmers can showcase produce with transparent pricing, while customers access fresh goods at fair rates—promoting better earnings for farmers and a more efficient supply chain.

Technologies Used: Dart + Flutter + Firebase + REST APIs

ACHIEVEMENTS & HACKATHONS

HackSpora 2k25 - National 24-Hour Hackathon

Participated in a national-level 24-hour hackathon by KAHE, collaborating on innovative tech solutions under time constraints.

MobilityX 2.0 - IEEE VTS Event

Attended a two-day IEEE VTS mobility innovation event, exploring solutions for next-gen transportation challenges.

ASTRANOVA 2K25 - Paper Presentation

Presented a paper on "Revolutionizing Agricultural Supply Chains through E-Commerce" at the national-level symposium hosted by CIT, discussing how digital platforms can improve efficiency and accessibility in the agricultural supply chain.
